

## Who We Are

Greenheck Group is the world's leading manufacturer of air movement, conditioning, control, and distribution equipment comprised of several brands including Greenheck, Innovent, Valent, Precision Coils, Accurex, Aiolite, and Metalaire. Our products are often found behind walls, in ductwork, or on the roofs of hospitals, schools, office buildings, warehouses, data centers, hotels, restaurants, industrial plants, and other commercial spaces worldwide. The company was founded more than 75 years ago when brothers Bernie and Bob Greenheck opened a small sheet metal shop in Schofield, Wisconsin upon their return home from World War II, and it is still owned by the Greenheck family today.

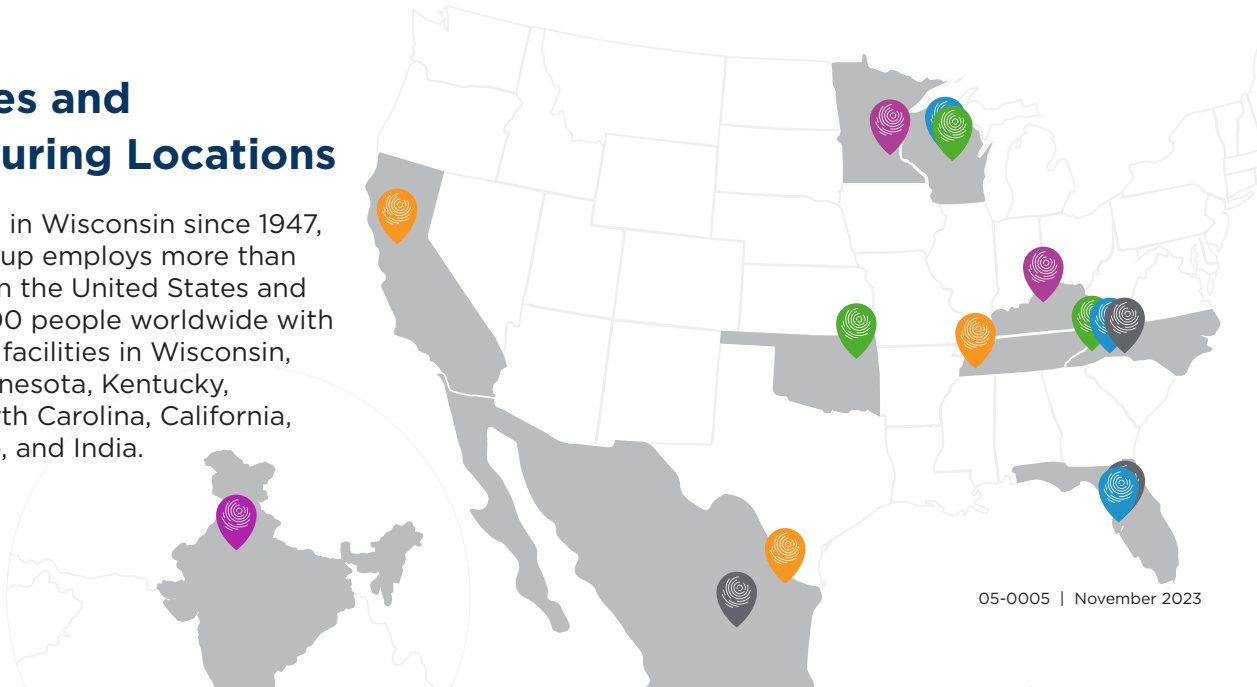

## Product Line

Our flagship brand, Greenheck, manufactures and distributes an extensive product offering including commercial fans and industrial blowers, laboratory exhaust systems, dedicated outdoor air systems, energy recovery ventilators, air handling equipment, make-up air equipment, and kitchen ventilation systems. Related products include air-control dampers, fire and smoke control dampers, heating and cooling coils, air terminal units, grilles, registers, and diffusers as well as architectural and mechanical louvers.

## Employees and Manufacturing Locations

Headquartered in Wisconsin since 1947, Greenheck Group employs more than 5,000 people in the United States and more than 5,500 people worldwide with manufacturing facilities in Wisconsin, Oklahoma, Minnesota, Kentucky, Tennessee, North Carolina, California, Florida, Mexico, and India.

# Commitment to HVAC Energy Efficiency & Sustainability

Greenheck Group is involved in the development of standards, regulations, and programs that result in energy-efficient HVAC systems as well as the practical selection and application of energy-efficient products manufactured for these systems.

Our engineers are active with many government and industry organizations working to establish performance standards and application guidance related to HVAC systems and products.

Agencies we interact with:

## Commitment To Provide Safe, Indoor Air

Our sole focus has always been on improving indoor air quality in commercial, institutional, and industrial buildings. Our commitment continues through the engineering and manufacturing of our high-quality ventilation products that play a critical role in delivering the essentials of healthy indoor air—ventilation, humidity control, proper filtration, and air circulation—creating safer, more comfortable, and more productive indoor environments.

# IAQ

## Training & Innovation

Our Wisconsin campus hosts the Bernard A. Greenheck Education Center where engineers, contractors, architects, and manufacturer’s reps receive interactive product training along with the opportunity to learn more about the latest industry codes and standards. Here you will also find our state-of-the-art Robert C. Greenheck Innovation Center where new product designs are explored, placed through comprehensive and demanding evaluation procedures, and rated for specific performance requirements. These facilities demonstrate our ongoing commitment to industry education and energy-efficient ventilation product development for improved indoor air quality and a healthier, more sustainable future.

## Accolades

Greenheck Group has been named to the America’s Best Mid-Sized Employer list by Forbes Magazine four times, most recently in 2023. Greenheck Group is also a four-time recipient of the Wisconsin Manufacturer of the Year Award.
