

Who We Are

Greenheck Group is the world’s leading manufacturer of air movement, conditioning, control, and distribution equipment comprised of several brands including Greenheck, Innovent, Valent, Accurex, Airolite, and Metalaire. The products our team members create are often found behind walls, in ductwork, or on the roofs of hospitals, schools, office buildings, warehouses, hotels, restaurants, industrial plants, and other commercial spaces worldwide. The company was founded in 1947 when brothers Bob and Bernie Greenheck opened a small sheet metal shop in Schofield, Wisconsin upon their return home from World War II, and it is still owned by the Greenheck family today.

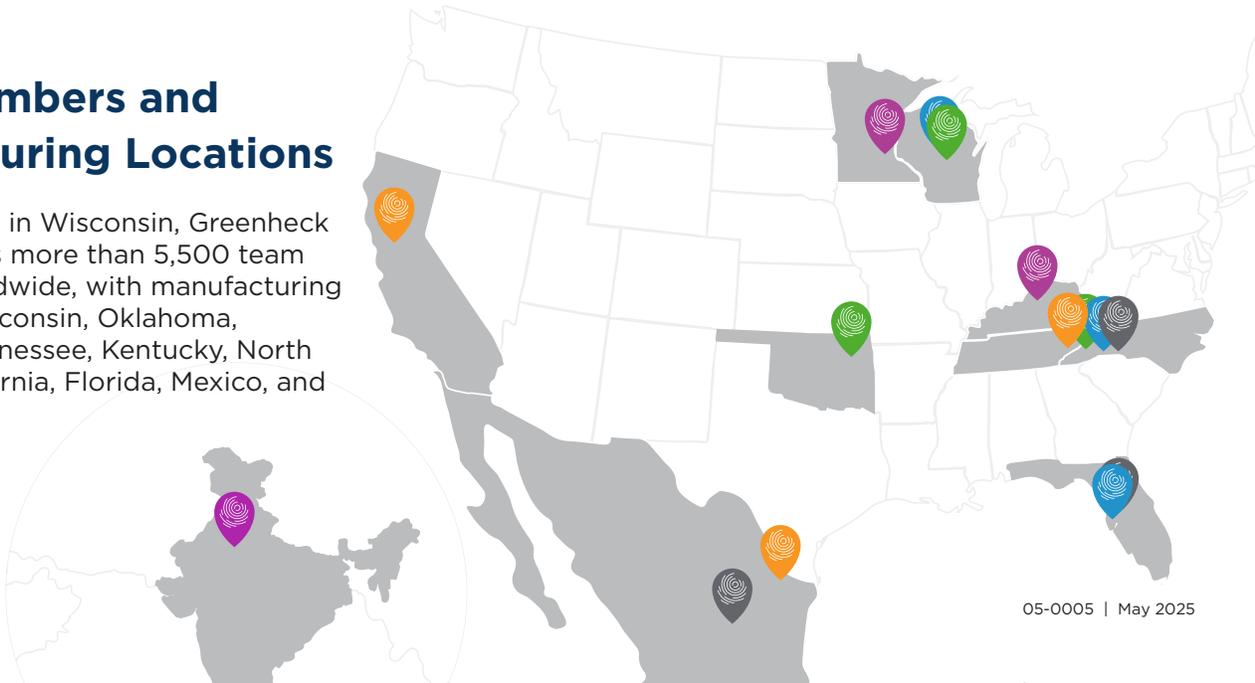

Our Brands

Our flagship brand, Greenheck, manufactures and distributes an extensive product offering including commercial fans and industrial blowers, laboratory exhaust systems, dedicated outdoor air systems, energy recovery ventilators, air handling equipment, make-up air equipment, and kitchen ventilation systems. Related products include air-control dampers, fire and smoke control dampers, heating and cooling coils, air terminal units, grilles, registers, and diffusers as well as architectural and mechanical louvers.

Team Members and Manufacturing Locations

Headquartered in Wisconsin, Greenheck Group employs more than 5,500 team members worldwide, with manufacturing facilities in Wisconsin, Oklahoma, Minnesota, Tennessee, Kentucky, North Carolina, California, Florida, Mexico, and India.

Our products make an impact. Here's how...

Designed with people in mind

Our products transform air quality—removing toxic fumes, stopping fire and smoke, and delivering clean air where it matters most, keeping people safe and healthy for decades.

Committed to the climate

Our innovative products are rigorously tested to cut commercial ventilation energy use by over 80%, reducing carbon emissions through innovative design for a healthier planet.

Prepared to deliver in times of need

During the COVID-19 pandemic, we turned a Reno parking structure into a fully ventilated patient care space—ensuring safe, clean air when it mattered most.

Continuous Education

Each year, over 2,000 visitors—including industry representatives and students—explore our Education Center, engaging with interactive displays and hands-on learning experiences.

Clean air worldwide

Our products are manufactured across the US, Mexico, and India, allowing us to serve customers around the globe.

Engineering healthy environments

By actively engaging with trade associations, we lead in advancing energy efficiency across the industry.

Accolades

Greenheck Group has been named to the America's Best Mid-Sized Employer list by Forbes Magazine five times, most recently in 2025. Greenheck Group is also a four-time recipient of the Wisconsin Manufacturer of the Year Award, and eight-time winner of the Wisconsin United Way Gold Award.
